

Triple stage water filtration system for maximum filtration at the point of entry into the home. The system is designed to provide clean, pure, chemical-free water to every tap in your home

Whole House Water Filtration

Features

Bacteriostatic

The Triple Stage System lasts longer as bacteria growth in the filter is inhibited, along with the reduction of harmful toxins such as:

- Chlorine
- Heavy metals
- Bad tastes and odours

Healthy Choice

Our system helps to:

- Eliminate dry skin and hair
- Alleviate skin allergies
- Reduce harmful substances entering your body
- Improve respiratory health

Low Maintenance

Our filters possess superior dirt-holding capacity to:

- Maximise harmful contaminant removal
- Improve water pressure
- Extend filter life so you have less maintenance to do

Cost Effective

We offer great pricing on system packages & guarantee our products offer superior:

- Filters
- Equipment
- Price
- Service!

Discover the Benefits of our system

Whether you're on mains water or tank water* our system will benefit your whole household.

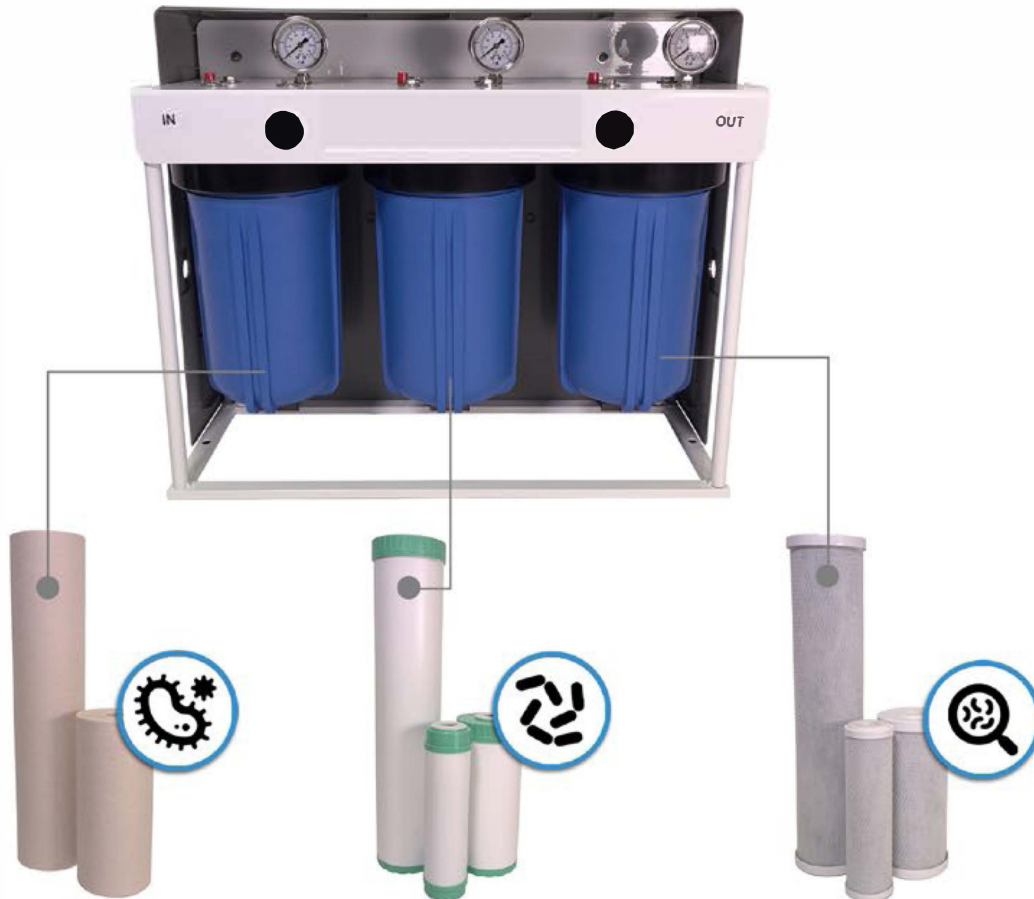

Drinking Water

Showers & Baths

Food Preparation

1. Bacteriostatic Filter

- 5 micron polypropylene filter will remove sand, dirt and rust particles
- Reduce bacteria & sediment
- Nano-zinc technology inhibits bacteria growth in the filter housing, resulting in longer filter life and greater dirt holding capacity

2. Heavy Metal GAC Filter

- Created from activated carbon, made from crushed coconut shell
- Will remove chlorine, organic chemicals and improve taste and odour of your water
- Large internal surface area will ensure contaminants in drinking water are completely absorbed

3. Security Filter

- Activated carbon block cartridge acts as a safeguard for high water demand or above average metal content
- The unique pore structure of the carbon is best suited for the absorption of volatile organic chemicals

* Optional Filter to reduce lime scale can replace the GAC filter if required

TASTE THE DIFFERENCE
 CLEAN | PURE | GREAT TASTING | WATER
